

# Similarity of physical activity in youth: Selection and/or influence?

Thabo van Woudenberg

Burk, W.  
Bevelander, K.  
Buijs, L.  
Smit, C.  
Buijzen, M.

ISBNPA 2017, Victoria

# *my movez*

-  Promoting a healthy lifestyle for children and adolescents.
-  Focus on physical activity

# Social network intervention

**my  
movez**

# Is there similarity in physical activity among friends?

## Similarity in physical activity

Selection

Influence

## Selection

Do youngsters select friends based on physical activity levels?

	T1	T2	T3
Youngster A	Active	Active	Active
Youngster B	Moderate	Moderate	Moderate
Youngster C	Active	Active	Active

 friends

 non-friends

## Influence

Do youngsters select friends based on physical activity levels?

Do youngsters influence the amount of physical activity of friends?

	T1	T2	T3
Youngster A	Active	Active	Active
Youngster B	Moderate	Active	Active
Youngster C	Moderate	Inactive	Inactive

 friends

 non-friends

## Smartphone - MyMovez app

- Assessment of social network  
*Friendship nominations*

## Study sample

- Subset of myMovez project sample
- Participation > 60% of the class for all three waves
- N = 114 (45% Boys, *M* age = 10.31 (*SD* = 1.33), range = 8-13)
  - 6 classes (4 primary, 2 secondary)

## Network effects

- outdegree (density)	-1.6205	(0.3644)	-4.4470	<.001
- reciprocity	0.9664	(0.1112)	8.6906	<.001
- transitive triplets	0.1900	(0.0187)	10.1604	<.001
- 3-cycles	-0.0670	(0.0333)	-2.0120	.044
- indegree - popularity (sqrt)	-0.2351	(0.0929)	-2.5307	.011
- outdegree - activity (sqrt)	0.3655	(0.1195)	3.0585	.002
- out-out degree <sup>(1/2)</sup> assortativity	-0.1169	(0.0435)	-2.6874	<.001
- Alter	-0.0112	(0.0465)	.2409	.809
- Ego	-0.1303	(0.0451)	2.8891	.004
- Similarity [Selection effect!]	0.7313	(0.3519)	2.0261	.042
- Same sex	0.7365	(0.0964)	7.6400	<.001

## Behavior effects

- Linear shape	0.1634	(0.0746)	2.1903	.029
- Quadratic shape	-0.0424	(0.0677)	-.6263	.53
- Total similarity [Influence effect!]	0.0302	(0.1348)	.2240	.82
- Effect from sex	-0.2420	(0.1391)	1.7398	.08

## Conclusion

- Pupils select new friends on the basis of physical activity
- Pupils do not influence the physical activity of their friends
- A social network intervention seem not worthwhile

## Conclusion

- Pupils select new friends on the basis of physical activity
- Pupils do not influence the physical activity of their friends
- A social network intervention seem not worthwhile

[t.vanwoudenberg@maw.ru.nl](mailto:t.vanwoudenberg@maw.ru.nl)

## Discussion

- Relatively a small sub-sample, difference with total sample
- Convergence of the network models
- Loss of accuracy by changing continuous physical activity measure to 5 categories
